## Preparing for Roach Treatment

### Bathroom

- Take all items out of the medicine cabinet, out from under the sink and off the countertop.
- Put all items in the bathtub and cover with a towel.

### Bedrooms

- Remove ALL item from dresser drawer and put in garbage bags in middle of room. Then remove drawers from all dressers and cabinets.
- Remove all toys, shoes and any debris from floors and closets. Place all items on bed and cover with a towel.

### Kitchen

- Take all the items out of the cupboards, drawers, shelves and counters.
- Put all items on or underneath your kitchen or dining room table and cover with a sheet or a tablecloth.
- Cupboards, drawers, shelves and counters areas need to be washed down before we spray and **NOT** washed again for 30 days.

### Living Rooms/Hallways/Closets

- All baseboards need to be cleared of furniture, toys and ALL debris.
- Floors should be vacuumed or washed and not cleaned again for 30 days.

**Tenants may see an increase in roach activity following the treatment, due to the irritation from the chemical. The roaches “running” is a sign that the chemical is working and does not necessitate a call back. Please allow the treatment to work for at least 14 days before calling to schedule a Follow-up treatment.**
