Seasonal Outside Spider Program

Frame's outside spider program consists of 3 treatments; 1 in spring, 1 in summer, 1 in fall. The purpose of the treatment is to minimize spiders, their webs and their eggs from moving onto the exterior of your home. Three treatments are recommended because it takes into account the life of the treatment and the developmental cycle of spiders.

Reminders:

- Windows may have streaks after treatment so please do not clean before treatment. Clean with water.
- Our chemical can take time to work completely, please give it 10- 14 days before calling back.
- Treatments can be made before rain as long as it is given time to dry. The treatment is then water resistant.
- Close windows before treatment and cover any outdoor furniture you don't want sprayed.
- All fish ponds must be covered or have fish removed before treatment and water cleaned before fish put back.

NEW! Guardian Programs

Guardian:

Frame's guardian program is a quarterly, indoor outdoor, service; that is guaranteed to prevent structural pest from moving into your home and spiders and flying insects from nest on your house.

GuardianPlus:

All the benefits of the Guardian Program with Sentricon termite baiting system at nearly half off.

Target Pest Programs

Programs that treat for:

- | | |
|--------------|--------------------|
| + Ants | + Spiders |
| + Bed Bugs | + Rodents |
